

Final Year Project

Marking and assessment summary

1. Artefact/Demos

We have organised demo days for **5th – 7th May**. The demos will take place in the SETEC building and David Bell Cinema.

Students will be booked into a slot by the module leaders, at a time when their supervisor is free

At least one other academic as well as any other interested students and staff may attend. External visitors may also be invited

Students can choose between a conventional presentation of 15 mins long on one of the big screens. The presentation must include a demo of their artefact

Alternatively, students can opt to create a tabletop display as part of a group exhibition where their supervisor and visitors may interact with their artefact. Ancillary artefacts such as prototypes may also be displayed.

A form will be circulated to students where they express a preference for their presentation type and students will be encouraged to brainstorm on how to best present their work in the last FYP on campus session.

A more formal viva meeting with the student, supervisor and a second marker will be arranged in some cases. This would be usually where there has been a lack of engagement with the supervisory process. Students will be notified if this applies to them.

The marking of the demo/artefact is integrated into the main report marking, see next section.

2. Report

The report deadline is **1 May**.

Students with self-certified extensions will hand in by 8 May, 2 week extensions by 15 May.

Note that the demos take place before students with extensions hand in. In these cases students should ensure that the artefact is finished in time for the demo days, even if the report still needs some work.

In line with University Regulations, marking takes place as follows:

- **The project is single marked, by the supervisor only.**
- Pre-marking calibration meetings and post-marking moderation meetings will take place to ensure consistency between the marking teams. These meetings do not involve students but require the participation of all supervisors. The meetings are already in our calendars.

3. Final marking

The final mark will comprise:

- 10% poster
- 20% mid-point review
- 70% artefact/final report

The final mark given will be the most appropriate mark in the categorical marking range, so there may be some adjustment to align the work to the University-wide categorical marking scheme.
